

Muhammad Haneef

Flutter Developer | Cross-Platform Mobile Apps (Android, iOS, Web) | Mobile App Developer

Islamabad, Pakistan | +92 303 0038699 | haneef93907@gmail.com

Portfolio: <https://muhammadhaneef.vercel.app/> | LinkedIn: <https://www.linkedin.com/in/muhammad-haneef-flutterdev/>

Profile

Flutter Developer with 3.5+ years of experience in Computer Science, Software Engineering, and Computer Engineering domains, building scalable cross-platform mobile applications for Android, iOS, and Web. Experienced in application deployment on Google Play Store and Apple App Store, with strong focus on application security, data protection, analytics, and scalability. Specialized in offline-first architecture, debugging, and performance optimization, delivering up to 90% performance improvements and reducing processing time from 50 minutes to as low as 5-7 minutes. Strong expertise in Flutter packages integration and real-world production systems across e-commerce, AI, and enterprise applications.

Skills

- **Core Expertise:** Flutter (2.x, 3.x), Dart, Object-Oriented Programming (OOP), Cross-Platform Mobile Development, Scalable App Architecture, Debugging, Release Management, Production-Grade App Delivery, Version Control (Git)
- **Architecture & Design Principles:** Clean Architecture, SOLID Principles, Design Patterns, Modular Architecture, MVC, MVVM, Dependency Injection, Separation of Concerns
- **State Management:** BLoC, Riverpod, Provider, GetX
- **Backend & API Integration:** REST APIs, GraphQL, Python (FastAPI), Node.js (Express), OAuth2, JWT Authentication, Token-Based Security
- **Databases & Storage:** Firebase Firestore, MongoDB, SQLite, Hive, SharedPreferences
- **Testing & Quality Assurance:** Unit Testing, Widget Testing, Integration Testing, Mockito, Debugging Strategies
- **Performance Optimization:** App Size Optimization, Lazy Loading, Memory Optimization, UI Rendering Optimization, Flutter DevTools Profiling
- **Cloud & DevOps (CI/CD):** Firebase, AWS, Azure, DigitalOcean, Codemagic, Bitrise, Fastlane, GitHub Actions, CI/CD Pipelines, Automated Build Deployment
- **Development Tools & Platforms:** Git, GitHub, Bitbucket, Visual Studio Code, Android Studio, Xcode
- **Push Notifications & Messaging:** Firebase Cloud Messaging (FCM), OneSignal, WebSocket, Push Notification Systems
- **Monitoring & Third-Party Services:** Crashlytics (Crash Reporting), Firebase Analytics, Firebase Services
- **Agile & Collaboration:** Agile/Scrum, Sprint Planning, Kanban, Jira, Trello, Code Reviews, Technical Documentation, Team Collaboration
- **Soft Skills:** Time Management, Problem Solving, Fast Learning, Adaptability, Ownership of Features, Working Under Tight Deadlines

Experience

- **Emblem Technology** Jan 2023 - May 2026
Flutter Developer / Software Engineer Lahore, Pakistan
 - Owned end-to-end delivery of 5+ client products from requirements gathering and system design to Play Store release serving 20K+ users across e-commerce, AI, and compliance domains.
 - Architected and developed backend services using Node.js, FastAPI, and Firebase, integrating REST and GraphQL APIs with Flutter mobile applications.
 - Established CI/CD pipelines using Codemagic and AWS, reducing release cycles by 30% and eliminating manual deployment errors across multiple environments.
 - Led and mentored a cross-functional team of 20+ engineers, managing Agile sprints, code reviews, and end-to-end delivery timelines.
 - Designed and implemented offline-first mobile architectures using SQLite, Hive, and Supabase, achieving near 100% availability in low-connectivity environments.
 - Reduced cloud infrastructure costs by 98% through optimized data synchronization strategies and edge-side processing.
- **DigitalUx** Jun 2022 - Jan 2023
Flutter Developer Lahore, Pakistan
 - Delivered 4+ production-grade Flutter applications across social, entertainment, on-demand, and fintech domains successfully published on Google Play and the App Store.
 - Implemented real-time features including live chat, push notifications (OneSignal), in-app purchases, and NFC-based payment flows, enhancing user engagement and monetization.
 - Contributed to the development of an internal Jira-style ticket management system, improving issue tracking and cross-team collaboration across the delivery pipeline.
 - Collaborated with clients, product managers, and designers to translate business requirements into scalable, high-quality, production-ready mobile UI/UX.

Projects

- **Amanah Halal Engine (Seiyaaj Platform)** April 2025 - Present
Flutter, Firebase, FastAPI, AI/ML, Computer Vision, IoT
 - **Multi-Role Flutter App:** Built a cross-platform system for Slaughterhouse Admin, Slaughterman, and End Users to manage halal compliance workflows.
 - **AI-Powered Verification:** Integrated AI services for animal detection, pose/orientation validation, knife sharpness check, and Takbeer audio detection.
 - **Edge + Cloud Architecture:** Implemented Raspberry Pi-based edge devices with camera and sensors for offline-first processing and real-time cloud sync.
 - **Slaughter Event System:** Designed event-driven workflow capturing animal identity, slaughter validation, and compliance logs with audit-ready records.
 - **Identity Compliance:** Implemented face recognition-based slaughterman authentication and government-ready compliance tracking dashboard.
- **More Betters** Sep 2024 - Present
Flutter, Dart, Bloc, Firebase, AI/ML, REST APIs, Figma
 - **AI-Powered Self-Improvement:** Conversational AI providing career, financial, and personal guidance for underserved users.
 - **Mobile-First Design:** Responsive UI tailored for gig workers and mobile users.
 - **Curated Content:** Integrated professional, educational, financial, and health resources.
 - **Impact:** Improved user engagement by 30% during early-stage product rollout, validating product-market fit and driving initial user adoption.
- **My Clone** May 2023 - Aug 2024
Flutter, Swift, RealityKit, Provider, REST APIs
 - **System:** Queue, scan, and order management system with offline-first architecture.
 - **Performance:** Reduced scan processing time from 50 minutes to 5-7 minutes (86% improvement).
 - **Optimization:** Reduced cloud infrastructure cost by 98% via optimized sync architecture.
- **Best Buy Mall** Jan 2023 - Apr 2023
Flutter, Android Native, Dart, Provider, Bitbucket
 - **Order Tracking:** Users track orders through all stages; businesses manage customer info efficiently.
 - **Store Management:** Manage store operations remotely for pickup, dine-in, or delivery.
 - **Search & Registration:** Users register, search businesses, browse products, and place orders seamlessly.
- **GTC App** Jun 2022 - Jan 2023
Flutter, Bloc, Firebase
 - **Engagement Platform:** Developed a task-based social engagement app enabling users to grow networks, follow channels, and complete activities for rewards.
 - **Features:** Implemented user tasks, reward system, social integrations, and real-time progress tracking for seamless user experience.
 - **Impact:** Enhanced user retention and engagement through gamified interactions and reward-driven participation.
- **Rock and Love** Jun 2022 - Jan 2023
Flutter, Dart, Bloc, GitHub
 - **Event Management:** App for bands and fans to organize concerts and events.
 - **Fan Interaction & E-commerce:** Boosted engagement by 40% and enabled ticket/merchandise sales.
 - **UX & Performance:** User-friendly interface with robust API integrations and real-time updates.

Education

- **University of Engineering and Technology** Sep 2017 - May 2021
B.Sc. in Computer Engineering
 - GPA: 3.34/4.00Taxila, Pakistan

Leadership & Soft Skills

- **Leadership:** Led cross-functional teams of 10+ engineers, managing Agile sprints, task delegation, and delivery timelines.
- **Communication:** Strong client communication and stakeholder management, translating business requirements into technical solutions.
- **Problem Solving:** Expert in debugging complex production issues and optimizing performance-critical mobile applications.
- **Mentorship:** Mentored junior developers through code reviews, pair programming, and best practices in Flutter and clean architecture.
- **Ownership:** Demonstrated full ownership of projects from ideation to deployment and post-release support.
- **Collaboration:** Worked closely with designers(UI/UX), Quality Assurance (QA) Team, backend engineers, and product teams to deliver high-quality user experiences using my collaboration skills.
- **Adaptability:** Quickly adapts to new technologies, frameworks, and evolving project requirements.
